

Effectively Using ForeFlight in VFR and IFR Operations

If you give up paper charts for programs like ForeFlight, the first question would be: "Is it legal?". We will answer that question and more. We will also show you a few of little tricks that we have learned over the past few years on how to make ForeFlight an effective tool in the cockpit. We will be discussing its use in both VFR and IFR situations. This seminar will be good for the experienced ForeFlight User and the pilot that has never seen it but wants to decide if it is for them. Bring your iPads and follow along.

Directions: From Colonial Drive turn south on Rickenbacker Dr. Continue past Fairgreen St. to the end of Rickenbacker Dr. and into the parking lot. Park in any available spot. Walk east to the Airport Administration Building.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
